

TMA4285 Time series models

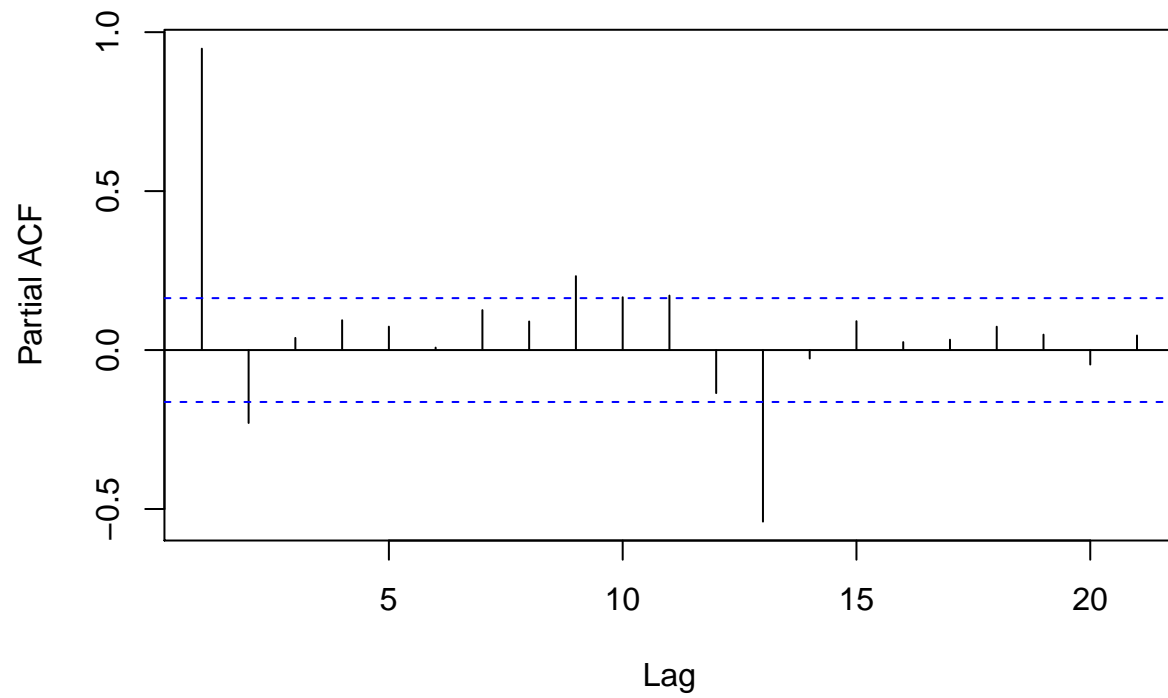

Exercise 8: Comparison of a state space model and a SARIMA model

Sivert Selnes, Kristine L. Mathisen, Gina Magnussen

20th of October 2018

Series dataseries

Theory is written here (in theory.Rmd)

Note how uncertainty should be written: 0.056(7)

Tasks

1. Exploring the data with plotting of relevant statistics
2. Justification of the choice of model
3. Model parameter estimation including uncertainty
4. Model prediction at the given sample points and for the next year including uncertainty of the best linear predictions
5. Diagnostics, and model choice discussion including comparison of the two models

Structure
